NETFLIX CONTENT STRATEGY ANALYSIS

Power BI | Data Cleaning & Storytelling Project

Objectives:

This dashboard analyzes Netflix's content from 2008 to 2021 to better understand its composition, audience targeting, performance patterns, and geographic diversity.

Using ratings, genres, release trends, and country data as performance proxies, this analysis aims to identify strategic gaps and opportunities, to improve content investment decisions and subscribers retention.

DATA INSIGHTS

1. Content Mix & Duration Patterns: Movies (70%) vs TV Shows (30%)

- Netflix historically leaned heavily toward movies (Shorter viewing cycles) as volume drivers.

2. Geographic Content Distribution (Top 5 Countries) - USA (61%) , INDIA (21%) , UK (9%), JAPAN (5.3%), SOUTH KOREA (4.3%)

- Most of the content is centered on English-speaking, high-population countries with strong entertainment industries.
- This aligns with an international growth strategy built around scaling in large, proven markets and investing in localized content.
- Heavy concentration in these regions may also mean there's still room to grow in underrepresented markets.

3. Ratings Concentration - TV-MA, TV-14

- Most content is rated TV-MA and TV-14, indicating a strong emphasis on mature content audiences, especially in the top five producing countries.
- Popular genres align with these ratings, suggesting higher audience demand for mature content.

4. Top 3 Popular Genres - International, Dramas, Comedy

- A high share of international titles reflects content globalization, while the dominance of drama and strong presence of comedy show audiences seek both emotionally driven stories and light, escapist entertainment.

5. Content Released Trend Shift (2016–2020)

- 2016–2018:After 2016, movie releases climbed quickly, but by 2018 the pace slowed.
- 2020: Noticeable Drop in TV Shows. TV show releases fell sharply in 2020, meaning fewer ongoing series to keep audiences coming back regularly. Possibly due to the pandemic that may affect production.
- Business Implication: When content volume shifts rapidly, subscriber growth and engagement can feel unstable. A drop in TV shows may weaken subscribers retention.

6. Top Directors Ratings Insights

- Youseff Chahine performs well with TV-MA/TV-14 content. Suhas Kadar with TV-Y7, and David Dhawan with TV-14/TV-PG.

BUSINESS STRATEGY

**Estimated business impacts are derived using metrics from the Netflix Annual Report 2021. The projections are based on scenario modeling and analytical assumptions, and are intended to illustrate potential strategic outcomes rather than exact forecasts.

STRATEGY RECOMMENDATIONS	BUSINESS IMPLICATIONS
Increase investment in TV Shows content & develop long-term franchise ecosystems around high-performing genres (International, Dramas & Comedy. Strengthen viewer engagement and encourage longer subscriber retention.	Investing in scalable franchises could improve subscriber retention and lifetime value, potentially contributing up to **~$600M in annual revenue growth.**
Increase investment in TV Shows content & develop long-term franchise ecosystems around high-performing genres (International, Dramas & Comedy. Strengthen viewer engagement and encourage longer subscriber retention.	If localized content drives subscriber growth, this strategy could support new user acquisition and contribute meaningfully to revenue; specific figures would depend on market performance.
Increase investment in TV Shows content & develop long-term franchise ecosystems around high-performing genres (International, Dramas & Comedy. Strengthen viewer engagement and encourage longer subscriber retention.	Improved content success could enhance subscriber engagement and retention, with a potential positive impact on revenue.
